Flux Brush

Ref. FL-A

Packing List

The following items should be included:

Flux Brush 1 unit
Ref. FL-A

Manual 1 unit
Ref. 0011278

Features

FL-A is a flux brush designed to be used in the preparation of printed circuits prior to soldering an SMD component, especially flat pack integrated circuits.

All you need to do is fill the barrel with the flux.

Our pens have a retractable valve in them so you have complete control of how much flux you release by gently squeezing the barrel.

Filling the barrel

1. Unscrew the brush cap from the barrel.

2. Remove the filter cap that seals the flux in the barrel.

3. Completely fill with flux and reseal with the filter cap.

Use JBC Flux and follow the safety instructions.

Specifications

- Capacity: 5.5 ml

JBC

Warranty

JBC's 2 year warranty covers this device against all manufacturing defects, including the replacement of defective parts and labour.

Warranty does not cover product wear due to use or mis-use.

In order for the warranty to be valid, equipment must be returned, postage paid, to the dealer where it was purchased.

This product should not be thrown in the garbage. In accordance with the European directive 2002/96/EC, electronic equipment at the end of its life must be collected and deposited at an authorized recycling facility.
